

PROFESSIONAL EXPERIENCE - OPEN TO RELOCATE

Contract (remote from Argentina) | Senior Software Engineer (Full-time, July 2025 - Present, 11 months)

Multi-chain crypto, fintech, AI, and consumer-app platforms across several engagements.

- Architected multi-chain portfolio aggregator (70+ chains via single-address fan-out): cut per-user RPC cost as coverage scaled
- Engineered self-hosted crypto checkout on ETH and Base (HD-wallet derivation + webhooks): removed payment-processor fees
- Developed FIFO cost-basis tax engine across EVM and non-EVM chains: collapsed multi-chain tax reporting to one CSV export
- Shipped self-custodial DeFi wallet with gasless ERC-4337 transactions and ERC-4626 yield vault: social login, no seed phrase
- Designed documentation search + answer engine (binary-quantized vectors, two-stage retrieval): 32x smaller index at 99% recall
- Created vehicle maintenance app tracking 3 service types with logged costs: exportable record to prove upkeep at resale
- **Stack:** Golang, TypeScript, React, Kotlin Multiplatform, iOS, PostgreSQL/TimescaleDB, pgvector, Redis, Solidity, k8s, Docker

[SardineAI](#) (US, remote from Argentina) | Senior Software Engineer (Full-time, March 2023 - July 2025, 2 years 5 months)

One platform for fraud, payments, and compliance, used by [Coinbase](#), [Blockchain](#), [Gemini](#), [CarMax](#), [MetaMask](#), [Kraken](#), [Brex](#), [Exodus](#)

- Co-engineered [ML infrastructure](#), designed its APIs, integrated with Google Vertex, improving model deployment speed by 50%
- Created [fraud engine rule templates library](#), sped up onboarding of new clients by 2x, decreased number of support tickets
- Implemented [activity reports management cycle](#) integration with FinCEN, decreasing report filing time from days to minutes
- Engineered [merchant documents risk assessment service](#), creating new approaches to business fraud detection
- **Stack:** Golang, Python, Protobuf, Typescript, React, PostgreSQL, Redis, Google Cloud Platform, BQ, BT, Terraform, Docker

Contract (Dubai, remote from Argentina) | Senior Software Engineer (Full-time, Jan - March 2023, 3 months)

Mainly worked on [OneTrack](#), aggregating and running digital-ads traffic analytics from multiple sources for EU companies.

- Migrated ad-event processing from MongoDB to AWS DynamoDB: reduced cloud infrastructure costs by 50%
- Engineered serverless aggregation pipeline (20+ Lambda functions) processing 100k+ daily ad interactions from Meta and others
- **Stack:** Golang, AWS Lambda & DynamoDB, HTTP streaming, Docker, REST

[FundraiseUp Inc.](#) (US, Remote) | Senior Software Engineer (Full-time, June 2021 - December 2022, 1 year 7 months)

Donation system engineered for online fundraising, used by [UNICEF](#), [American Heart Association](#), [The Salvation Army UK](#), etc.

- Co-engineered new 3-mode version of [donation widget](#) (Vue.js -> React): improved widget's TTI (time-to-interact) metric by 30%
- Developed [crypto](#) and [stock](#) donations (UI, REST APIs & integrations): online stock donation functionality is the first in the world
- Co-created [system-wide localisation](#) (data architecture): allowed **UNICEF** to use the unified donation platform and expand in EU
- Added synchronization between main system and [translation service](#): automated translations delivery, previously done manually
- Implemented [peer-to-peer fundraising](#) (UI & REST APIs), allowed companies like **Apple** internal fundraising events, competitions
- **Stack:** Typescript, Node.js, React, Vue.js, MongoDB, Redis, Websocket, Docker, HTTP

[Muffins LLC.](#) (US, Hybrid) | Software Engineer (Full-time, June 2020 - June 2021, 1 year 1 month)

Remote engineering team working for clients like [GoPro](#), [Y Combinator](#), [RightWay Healthcare](#) and [Square](#), etc.

- Architected 5-stage real-estate deal processing system (proposal to legal): cut average deal completion time by 70%
- Built foodtech calculation + management platform, 7-composition pricing algorithm over nested ingredients: 3s execution
- **Stack:** Typescript, Node.js, Vue.js, GraphQL, PostgreSQL, Websocket, Docker, HTTP

Contract (Germany, Remote) | Software Engineer (Full-time, Dec 2018 - May 2020, 1 year 6 months)

Joined [Mediapark](#) & [Ronas IT](#) development agencies, working for clients like [Red Bull](#), [Vodafone](#), [Danske Bank](#), etc.

- Engineered aggregation + storage service for 100k+ landing pages (admin back-office + public UI/API): 1k+ daily users in 3 months
- **Stack:** Golang, PHP (Laravel), Typescript, Vue.js, Angular.js, gRPC & Protobuf, Websocket, Docker, HTTP

[Fraunhofer IZM](#) (Berlin, Germany) | Mechatronics Engineer (Part-time, Sep 2017 - Nov 2018, 1 year 3 months)

- Built automated 3D measurement + data-visualization workstations that accelerated R&D of the [world's smallest optical sensor](#)
- **Stack:** C, [LabView](#), SolidWorks, [Zumbach](#), [ANDO Spectrometer](#)

EDUCATION

University of Applied Sciences Technology & Economics, Berlin (2016 - 2019) (Withdrew)

Bachelor of Engineering — Engineering Informatics (Ingenieurinformatik)

Ranked 2nd in Mechanical engineering & Informatics in Germany (WirtschaftsWoche, 2022)

LANGUAGES

English - C1 (IELTS 7.5) • German - C1 (TestDaF 4.4.4.4) • Spanish - C1 • Russian - native

VOLUNTEERING

[Alzheimer Ontario Society](#) (2013-2014) • [Terry Fox Run](#) (2013-2015) • [Amnesty International](#) (2015)

HOBBIES

Crossfit • Swimming • Cycling • Roller Skating • Chess
